

Open your dreams... and find your style

Today, we live in a constant rush, seeking peace, beauty, and a safe haven at home and in the places we visit. A sense of security and harmony significantly enhances our daily quality of life. At INVADO, we understand and respect these needs. As one of Poland's fastest-growing door joinery manufacturers, we strive to deliver products with exceptional aesthetics and outstanding usability. With over thirty years of experience, we build our market position through continuous investment in technology, people, and quality improvement.

24
months of warranty
on INVADO products

QUALITY ABOVE ALL

The belief that quality is of the utmost importance remains the common denominator of the design phase and the entire production process at INVADO. This is confirmed, among others, by the ISO 9001 Certificate, which ensures that all our products meet high European standards. The guarantee of the quality of products and services, in addition to the price and timeliness of deliveries, is the basic goal of the company, enabling it to be perceived as a trusted partner.

CONSUMER'S LAUREL

Once again this year, the INVADO brand has been recognized by Polish consumers and honored with the prestigious Consumer Laurel ODKRYCIE 2024 award.

INVADO TECHNOLOGY

The cornerstone of INVADO's offerings lies in the production of door leaves and frames. A significant milestone in the company's history was the introduction of an innovative technique in 2007 known as the "Pass-Through Foiling System for Flat Doors." This cutting-edge technology, used in INVADO flat doors, revolutionized the process by eliminating visible seams at the rebate edge. As a result, the edges not only boast a sleek, aesthetically pleasing finish but also offer enhanced durability. The veneer's connection is cleverly concealed within the inner edge of the rebate, preventing any risk of tearing or detachment. Today, INVADO stands as one of Europe's most technologically advanced companies, thanks to this pioneering approach to door manufacturing.

BRAND OF THE DECADE 2009–2019; GOOD BRAND 2019 AND 2021

An independent group of experts confirmed that products bearing the INVADO logo are characterized by: quality, trust, and reputation, awarding our company the title of BRAND OF THE DECADE 2009–2019 and the titles of GOOD BRAND 2019 and GOOD BRAND 2021. We would like to thank our customers for the trust you place in us by choosing INVADO doors for their dream interiors, our Business Partners for fruitful cooperation, recommending, and support, and all INVADO Employees for jointly building a good brand at every stage of its creation. We are incredibly grateful that our hard work is appreciated and we look forward to the future with pride.

HYGIENIC CERTIFICATES

Hygienic certifications aim to prevent materials and products hazardous to health and life to be introduced to the public or limit the acceptable range and application methods to eliminate health risks. All INVADO products have hygienic certificates:

- interior door leaves in artificial veneer or flat lacquered
No. 348/322/353/2020

VOC

The VOC certification tests the emission of volatile organic compounds released from the facility and, depending on the results obtained, the tested sample is assigned a class, ranging from A+ (best) to C (worst). The possession of the VOC certificate confirms that the product does not release harmful to health substances inside the house, such as formaldehyde and benzene—carcinogenic elements that unfortunately are often contained in paints, and materials used on windows.

TECHNICAL APPROVALS AND NATIONAL TECHNICAL ASSESSMENTS

Technical Approvals and National Technical Assessments, issued by the Building Research Institute, are decisions that grant the use of building materials and products. In accordance with the Conjunction Products Act of April 16th 2004, as amended (unified text: Journal of Laws of 2016, item 1570), the products to which the Technical Approvals and National Technical Assessments relate, may be placed on the market and can be used in conjunction. INVADO Company assessed and verified the constancy of performance, made a national declaration of performance, and labeled the products with a conjunction mark in accordance with applicable regulations. INVADO's Technical Approvals and National Technical Assessments:

- Interior flat and glass doors—ITB-KOT-2017/0313 edition 2;
- Modular interior doors—ITB-KOT-2017/0003 edition 2;
- Adjustable door frames for interior doors—ITB-KOT-2019/1221 edition 2;
- Block door frames for interior doors OB3 type P—ITB-KOT-2017/0312 edition 2;
- Metal door frames—ITB-KOT-2021/2091 edition 1;
- Housing system for metal door frames—ITB-KOT-2019/1221 edition 2.

ISO 9001

The INVADO Company applies to the Quality Management System and fulfills the requirements of PN-EN ISO 9001 in the scope of designing, production, and sale of furniture components and finishing profiles, interior doors made of wood and wood-based materials, and technical doors.

The mark of responsible forestry

FSC®

Control of Product Origin and environmental protection are the leading elements of INVADO's development strategy. This is confirmed by an international certificate issued by the Forest Stewardship Council® and obtained by the company in 2007.

Ask for FSC® certified products in our range.

CERTIFICATE RESOURCES SAVED

INVADO has obtained the international certificate in waste management and recycling issued by INTERSEROH zero waste solutions.

COLLECTION OF MODULAR DOORS

COLLECTION OF FOILED DOORS

What's new?

ALUMINUM ACCENTS

We've expanded our range with Arteo doors, now featuring sleek aluminum flat accents. Available in black, gold, and silver, these finishes, combined with our variety of foils, offer a vast array of combinations. This allows you to create a personalized door that perfectly complements any interior.

for more info see page 68

LACOBEL GLASS INLAYS

The Lacobel glass inlays in the Vetra collection bring a distinctive character to the doors. The high-gloss panels draw attention and exude elegance, while the geometric shapes of the inserts create an illusion of height, making the room feel more spacious.

for more info see page 66

BLACK BOLECTIONS

The large glazing on the Vista doors ensures that rooms remain perfectly illuminated. Decorated with black bolections, the doors elegantly combine classic and modern styles.

for more info see page 14

FOILED AND MODULAR DOORS

FOILED DOORS

Foiled doors appear visually lighter than modular doors. They feature an MDF frame with a filling of either 'honeycomb' or chipboard, available at an additional cost. The frame and infill are covered on both sides with 3 mm thick HDF and decorative foil. Glazing beads are used to secure the infills in these models.

STABLE CONSTRUCTION
A robust MDF frame and the filling make a durable and stable leaf

RESISTANCE TO LOAD
2 or 3 (starting from width "90") screw-in pivot hinges

BASIC FILLING
"Honeycomb" panel

FILLING FOR EXTRA CHARGE
Tubular chipboard

TWO TYPES OF EDGES

- SOFT technology – rounded edge
- CUT EDGE technology – 90° edge

FOILED CONSTRUCTION
Glazing bead

SATINATO
Matt glass

Wide selection of **HANDLES**

VENTILATION
Sleeves, undercut or grid*
(*in selected door leaves only)

MODULAR DOORS

The construction of **modular doors** consists of two vertical frames and an upper and lower frame. The leaf can be filled with panels or glass of varying thicknesses. Each model can be customized with a decorative foil. Unlike traditional methods, the panes and other fillings in these doors are mounted simultaneously with the door construction elements, significantly enhancing their stability.

STRONG MODULAR CONSTRUCTION
No glazing beads

Wide selection of **HANDLES**

VENTILATION
Undercut, PVC, metal round or metal square sleeves

SATINATO
Matt glass

ROUNDED EDGES
Safe design

DOOR LEAF FILLING
MDF boards in different thicknesses

RESISTANCE TO LOAD
2 or 3 (starting from width "90") screw-in pivot hinges

REBATED AND NON-REBATED DOORS

REBATED DOORS

The edge of a **rebated door** is finished with a rim (Fig. 1) that overlaps the frame. This design ensures that the door does not sit flush with the frame.

NON-REBATED DOORS

The edge of a **non-rebated door** is a smooth, uniform plane. Doors constructed this way align with the frame on the hinge side (Fig. 2)

LEFT AND RIGHT DOOR

Before buying doors, it is worth considering in which direction they should open. For safety reasons, bathroom or kitchen doors should be installed in a way that makes it possible to open them outwards. In other areas, it is dependent on users' preference and the layout of the apartment or house.

The next step is to determine whether you need a right-hand or left-hand door. How can you tell? If the hinges are on the right side of the door frame, you'll need a right-hand door; if they're on the left, you'll need a left-hand door. It's important to consider this carefully before heading to the store. Make a list of the right-hand and left-hand doors you need, along with the opening direction for each one.

LEFT DOOR

RIGHT DOOR

DOOR PRICE CALCULATION

In most cases, the quoted prices are for a door leaf without a door frame and door handles. To obtain the full price of the door set, you have to use the following calculation:

door leaf price

door frame price

handle price

door set price

LEGEND

Please note the annotations marked with the following icons. They contain important information related to the door leaf models.

LACOBEL

SATINATO WITH ENGRAVING

ENDURO ●●○○○

ENDURO classification: a foil with high design value and excellent reproduction of the natural wood grain. It is characterized by its good durability properties.

ENDURO 3D ●●○○○

ENDURO 3D classification: three-dimensional reproduction of the wood structure and good durability.

ENDURO PLUS ●●○○○

ENDURO PLUS classification: a group of foils with high design value, noticeable texture, and good durability.

ECO-VENEER ●●●○○○

ECO-VENEER classification: high-quality laminate in modern colours, very high durability.

LAMINOLACK ●●●●○○

Classification LAMINOLACK: high-quality polypropylene foil is characterised by excellent durability.

LAMINATE CPL 0.15 mm ●●●●●● 0.8 mm ●●●●●●

Classification CPL: Foils with maximum strength. Available in two thicknesses – 0.15 mm (door leaves and frames) and 0.8 mm (door leaves).

COLLECTION OF MODULAR DOORS

Modular doors are an excellent choice for those seeking long-lasting products. Their construction ensures exceptional durability and high acoustic performance. These doors, also known as frame or 5-component doors, are built with two vertical frames, an upper and lower crosspiece, and an infill, allowing for a wide range of design options within a single collection. This solid frame construction ensures great stability, making these doors exceptionally sturdy and resilient.

Bolection only in black

CONSTRUCTION

1 the filling element (depending on the model):

- 1 hardened glass:
- satinato – 4 mm
 - transparent – 4 mm

2 MDF bolections

3 horizontal frame – MDF

4 vertical frame – MDF

- side edges and upper edge are foiled
- rounded vertical edges of door leaves (more info on p. 104)
- double door leaves have a rebate and a counter-rebate (drawing on p. 104)
- width of single doors: "60"–"100" / width of double doors: "120"–"200"
- bolection only in black

STANDARD EQUIPMENT

rebated	lock 72 mm for a standard key, a WC knob, or a cylinder lock insert
	screw-in pivot hinges 13.5/9 (white zinc)—2 pcs for door leaves in sizes "60"–"80", 3 pcs for door leaves in sizes "90" and "100"
non-rebated	magnetic lock 90 mm for a standard key, 95 mm for a WC knob, and 85 mm for a cylinder lock insert
	milling for hidden hinges with a 3D regulation

DEDICATED DOOR FRAMES

[OB3] block door frame (possibility to add an architrave 10 x 60 mm or 16 x 80 mm)	P. 106
[ORS1] adjustable door frame for rebated doors with a flat angle architrave 60 mm-wide	P. 108
[ORS8] adjustable door frame for rebated doors with a flat angle architrave 80 mm-wide	P. 108
[ORS7] adjustable door frame for modular non-rebated doors with a flat angle architrave 60 mm-wide	P. 110
[ORS10] adjustable door frame for modular non-rebated doors with a flat angle architrave 80 mm-wide	P. 110
[ORS4] adjustable 90° door frame for modular non-rebated doors with a flat angle architrave 80 mm-wide	P. 110
NOTE: THE OFFER ALSO INCLUDES METAL DOOR FRAMES	P. 112

ADDITIONAL OPTIONS

door without a keyhole

door width "100"

door made in non-rebated version

double door

sliding leaf

additional hinge for the door in sizes "60"–"80"

additional hinge for the non-rebated door—included in a door frame

caps for hinges (chrome, satin chrome, golden, black, white)—set for 1 hinge unit

ventilation undercut

PVC

sleeves metal, round (chrome, golden)

metal, square (chrome, nickel)

cylinder lock insert 31/36 (31/31 in non-rebated door leaves)

COLLECTION OF FOILED DOORS

Foiled doors, with their MDF frame construction, are significantly lighter than modular doors while maintaining high strength. Our collection offers a wide range of models featuring both modern and timeless designs at attractive prices. These doors are perfect for those looking to completely transform their interiors.

DOOR LEAVES OPTIONS

DECORS

Optimo Line 1

Optimo Line 6

- Due to the manufacturing technique, for doors from the OPTIMO LINE collection, it is possible to use the edge of the leaf in a different colour than its surface. The base for creating unique creations is the edge in the colour: pure black, alpine white, or natural Hamilton oak in combination with the OPTIMO LINE colour palette (p. 119)

CONSTRUCTION

- 1 the frame is made of an MDF board
- 2 (STANDARD) "honeycomb" filling
- 3 (OPTIONAL) tubular chipboard filling
- 4 HDF

- side edges and upper edge are foiled
- edge band in the colour of the door leaf
- cut edges (90°) of door leaf (more info on p. 104)
- double door leaves have a rebate and a counter-rebate (drawing on p. 104)
- width of single doors: "60"- "110" / width of double doors: "120"- "200"
- In double non-rebated door leaves, edge band in the colour of the door leaf and silver fittings are standard. However, it is possible to make them with pure black edge band and fittings as part of a custom order. In this case, please contact our Customer Service.

STANDARD EQUIPMENT

rebated	lock 72 mm for a standard key, a WC knob, or a cylinder lock insert

- 2 (STANDARD) "honeycomb" filling
- 3 (OPTIONAL) tubular chipboard filling
- 4 HDF

- side edges and upper edge are foiled
- rounded vertical edges of door leaves (more info on p. 104)
- double door leaves have a rebate and a counter-rebate (drawing on p. 104)
- width of single doors: "60"–"110" / width of double doors: "120"–"200"

STANDARD EQUIPMENT

rebated	lock 72 mm for a standard key, a WC knob, or a cylinder lock insert
	screw-in pivot hinges 13.5/9 (white zinc)—2 pcs for door leaves in sizes "60"–"80", 3 pcs for door leaves in sizes "90"–"110"

DEDICATED DOOR FRAMES

[OB3] block door frame (possibility to add an architrave 10 x 60 mm or 16 x 80 mm)	P. 106
[ORS1] adjustable door frame for rebated doors with a flat angle architrave 60 mm-wide	P. 108
[ORS8] adjustable door frame for rebated doors with a flat angle architrave 80 mm-wide	P. 108
NOTE: THE OFFER ALSO INCLUDES METAL DOOR FRAMES	P. 112

ADDITIONAL OPTIONS

door without a keyhole	
door width "100"; "110"	
double door	
sliding leaf	
tubular chipboard filling	
additional hinge for the door in sizes "60"–"80"	
caps for hinges (chrome, satin chrome, golden, black, white)—set for 1 hinge unit	
ventilation undercut	
PVC	
sleeves	metal, round (chrome, golden)
	metal, square (chrome, nickel)
cylinder lock insert 31/36

GROUP I

GROUP II

Amber doors are divided into groups due to the types of glass decorations:

GROUP I—basic glass
(transparent or matte
in various shades)

Amber 13—satinato glass

Amber 14—transparent glass

Amber 15—satinato glass

GROUP II—decorated glass
(engraving or overprint)

Amber 3—overprint on transparent glass

Amber 6—overprint on transparent glass

Amber 12—engraving on satinato glass

CONSTRUCTION

- tempered glass, 8 mm thick
- the matt side of a glass pane is on the hinge side
- block or adjustable door frame, 2 hinges

VENTILATION

According to the norm, the door to the bathroom, shower, and separate WC should open outwards, have a passage width of at least 0.8 m and height of 2 m, and have ventilation holes for the air supply in the bottom of the door with total ventilation area of at least 0.022 m². The total ventilation area is the sum of the gap under the door (standard 7 mm) and additional solutions that increase the total net ventilation area such as ventilation sleeves, ventilation undercut, and ventilation grid. The use of a ventilation grid ensures the correct ventilation area for all door widths, while using the sleeve and/or undercut the increased gap between the door and the floor should be used to meet the required regulations. If the regulations mentioned above must be obliged, the clients must trim the door on their own.

NOTE: D'ARTAGNAN, ARTEO AND VETRA DOOR LEAVES CANNOT BE FITTED WITH SLEEVES, UNDERCUTS OR VENTILATION GRIDS. SLIDING DOORS MEET THE VENTILATION REQUIREMENT DUE TO THE DESIGN OF THE SYSTEM. INVADO DOES NOT MAKE SEVERAL VENTILATION SOLUTIONS AT THE SAME TIME.

GUIDELINES FOR BUILDINGS EQUIPPED WITH A RECUPERATION SYSTEM

To ensure adequate airflow from the living areas to the corridor, sanitary, and auxiliary rooms, it is recommended that all internal doors should have a gap at the bottom. The gap area in doors in living and auxiliary rooms should be at least 80 cm² (INVADO doors with an undercut fully meet this requirement). The size of the ventilation gap in doors in sanitary rooms should be 200 cm².

WALL THICKNESS RANGE

DOOR FRAME
WIDTH
MODIFICATION

The adjustable door frame is made in dimensions adjustable to the wall thickness in steps of 20 mm. The minimum wall thickness is 75 mm.

NOTE: due to special mills, there is a possibility to trim the frame and reduce the wall thickness coverage by 15 mm. Door frame for wall thickness greater than 360 mm consists of at least two connected components.

Adjustable door frame

FOR NON-REBATED DOORS [ORS7/ORS10/ORS4]

HINGE

ORS7
ADJUSTABLE DOOR FRAME
+ FLAT ARCHITRAVE 60 MM WIDE AND A "TONGUE" 30 MM LONG

ORS10
ADJUSTABLE DOOR FRAME
+ FLAT ARCHITRAVE 80 MM WIDE AND A "TONGUE" 30 MM LONG

CONSTRUCTION

- MDF board
- foiling—all decors available in the INVADO offer
- A set of 45° [ORS7] and [ORS10] or 90° [ORS4] jointed angle brackets is included as standard with the door frame. The standard angle bracket consists of a flat architrave, available in 60 mm or 80 mm widths, and a 30 mm long tongue. Additionally, a separate 50 mm long angle bracket with a tongue set can be ordered (see extra charges below).

DOOR FRAME FOR DOOR LEAVES IN WIDTH

- width of single doors "60" to "110"
- width of double doors "120" to "200"

OPTIONS AT EXTRA CHARGE

- door frames with sidelights and transoms (without glass) with circumference up to 5 l.m
- door frames for double doors
- additional hinge in door frame
- standard angle architrave (a "tongue" 30 mm-long, an architrave 60 or 80 mm-wide)
- angle architrave with longer "tongue" (a "tongue" 50 mm long, an architrave 60 or 80 mm-wide)

ORS4
ADJUSTABLE DOOR FRAME
+ FLAT ARCHITRAVE 90° 80 MM WIDE AND A "TONGUE" 30 MM LONG
(OPTION AT EXTRA CHARGE)

WALL THICKNESS RANGE

The adjustable door frame is available in sizes that accommodate wall thicknesses in 20 mm increments. The minimum wall thickness is 75 mm.

DOOR FRAME RANGE ADJUSTMENT

NOTE: For a wall thickness of 75-85, a frame with dimension A (75-94) must be used. In this case, the angle must be shortened at the milling point — otherwise the frame will not sit flush with the wall on both sides. A door frame for a wall thickness of 360 mm and above consists of at least two interconnected components.

Door frame for wall thickness from 360 mm

Concealed door frame SARA-PRO

SARA PRO in B733 foil

SARA PRO prepared for painting and wallpapering

The **SARA-PRO** door frame introduces a brand new quality in interior decoration. Invisible to the naked eye, it makes the area lighter. Ideal for minimalist and modern interiors. Available in outer and inner versions.

Non-rebated door leaf for outer door frame and rebated door leaf for inner door frame is based on the **NORMA DECOR 1** door leaf.

Housing system

FOR METAL DOOR FRAMES [ORS5]

- A** door frame housing
- B** metal door frame
- C** aluminium angle element
- D** gasket

FEATURES

- The ORS5 metal frame cover is an adjustable overlay frame that allows for the installation of a new door leaf and adjustable frame without removing the existing metal frame. By covering the old frame, it enables the use of standard INVADO door leaves.

NOTE: the ORS5 frame changes the position of the leaf in relation to the wall run.

WIDTH OF THE DOOR FRAME FOR DOOR LEAVES

- width of single doors "60" to "90"

RANGES OF WALL THICKNESS

- 60–94, 95–129, 130–199, 200–269
